REVIEW REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Directors and Shareholders of ChipMOS TECHNOLOGIES INC.

Introduction

We have reviewed the accompanying consolidated balance sheets of ChipMOS TECHNOLOGIES INC. and its subsidiaries (the “Group”) as of September 30, 2025 and 2024, and the related consolidated statements of comprehensive income for the three months and nine months then ended, as well as the consolidated statements of changes in equity and of cash flows for the nine months then ended, and the notes to the consolidated financial statements, including a summary of material accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standards No. 34, “Interim Financial Reporting” that came into effect as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of review

We conducted our reviews in accordance with the Standard on Review Engagements 2410, “Review of Financial Information Performed by the Independent Auditor of the Entity” of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews and the reports of other independent accountants, as described in the *Other matter* section of the report, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as of September 30, 2025 and 2024, and its consolidated financial performance for the three months and nine months then ended, and its consolidated cash flows for the nine months then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” that came into effect as endorsed by the Financial Supervisory Commission.

Other matter

We did not review the financial statements of a certain investment accounted for using the equity method which were reviewed by other independent accountants. Therefore, our conclusion expressed herein, insofar as it relates to the amounts included in the consolidated financial statements and the information on the investee disclosed in Note 13 is based solely on the reports of the other independent accountants. The balance of this investment accounted for using the equity method amounted to NT\$246,164 thousand and NT\$328,942 thousand, constituting 0.6% and 0.7% of the consolidated total assets as of September 30, 2025 and 2024, respectively, and total net comprehensive income including the share of profit and other comprehensive (loss) income of associate accounted for using the equity method amounted to (NT\$627) thousand, NT\$19,353 thousand, (NT\$35,264) thousand and NT\$54,356 thousand, constituting (0.2%), 5.9%, 118.8% and 4.2% of the consolidated total comprehensive income for the three months and nine months then ended, respectively.

Price risk

- i. The Group's financial instruments, which are exposed to price risk, are the financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in financial instruments, the Group diversifies its portfolio. Diversification of the portfolio is in accordance with the limits set by the Group.
- ii. The Group invests in beneficiary certificates and listed stocks issued by the domestic companies. The prices of equity securities would change due to change of the future value of investee companies. For the nine months ended September 30, 2025 and 2024, it is estimated that the prices of equity securities increase or decrease by 1%, with all other variables held constant, would increase or decrease the Group's profit before income tax by \$685 and \$717, respectively.
- iii. The Group's investments in financial instruments comprise foreign unlisted stocks. The prices of financial instruments would change due to different valuation models and assumptions used. Analysis related to the effect on profit or other comprehensive income if these assumptions change is provided in Note 12(3)G.

Interest rate risk on cash flow and fair value

- i. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's bank loans with floating interest rates. The Group manages its interest rate risk by having a balanced portfolio of fixed and variable rate bank loans. The Group reassesses the hedge management periodically to make sure it complies with the cost effectiveness.
- ii. The sensitivity analysis depends on the exposure of interest rate risk at the end of the reporting period.
- iii. Analysis of debt with floating interest rates is based on the assumption that the outstanding debt at the end of the reporting period is outstanding throughout the period. The degree of variation the Group used to report to internal management is

increase or decrease of 1% in interest rates which is assessed as the reasonable degree of variation by the management.

- iv. For the nine months ended September 30, 2025 and 2024, it is estimated that a general increase or decrease of 1% in interest rates, with all other variables held constant, would decrease or increase the Group's profit before income tax approximately by \$91,627 and \$108,447, respectively, mainly due to the Group's floating rate on bank loans.

(b) Credit risk

- i. Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss, mainly resulted from its operating activities (primarily accounts receivable) and from its financing activities (primarily deposits with banks and financial instruments). The Group is exposed to credit risk arising from the carrying amount of the financial assets recognized in the consolidated balance sheet.
- ii. Each business unit performs ongoing credit evaluations of its debtors' financial conditions according to the Group's established policies, procedures and controls relating to customer credit risk management. The Group maintains an account for loss allowance based upon the available facts and circumstances, history of collection and write-off experiences of all trade and other receivables which consequently minimize the Group's exposure to bad debts.
- iii. Credit risk from balances with banks and financial institutions is managed by the Group's finance unit in accordance with the Group's policies. Transaction counterparty of the Group is determined through its internal controls policy. For banks and financial institutions, only parties rated above BBB+ by Taiwan Ratings are accepted. The probability of counterparty default is remote, so there is no significant credit risk.
- iv. The Group adopts the assumptions under IFRS 9, "Financial Instruments" and the default is deemed to have occurred when the contract payments are past due over 90 days.
- v. The Group categorized contract assets, accounts receivable and other receivables by characteristics of credit risk and applied the simplified approach using loss rate methodology to estimate expected credit loss.
- vi. The Group referred to the forecastability of business monitoring indicators published by the National Development Council to adjust the loss rate which is based on historical and current information when assessing the future default possibility of contract assets, accounts receivable and other receivables. As of September 30, 2025, December 31, 2024 and September 30, 2024, the loss rate methodologies are as follows:

	September 30, 2025		
	Contract assets	Accounts receivable (including related parties)	Other receivables (including related parties)
Expected loss rate	0.030%	0.030%	0.030%

	Contract assets	Accounts receivable (including related parties)	Other receivables (including related parties)
Expected loss rate	0.030%	0.030%	0.030%
Total carrying amount	\$ 397,866	\$ 5,011,644	\$ 77,632

Loss allowance	\$ (114)	\$ (1,639)	\$ (17)

- vii. Under the simplified approach, movements in relation to loss allowance for contract assets, accounts receivable, and other receivables are as follows:

	2025		
	Contract assets	Accounts receivable (including related parties)	Other receivables (including related parties)
January 1	\$ (119)	\$ (1,490)	\$ (12)

- viii. The Group's recorded financial assets at amortized cost include time deposits with contract period over 3 months and restricted bank deposits. Because of the low credit risk, expected credit losses for the period are measured through a loss allowance at an amount equal to the 12-month expected credit losses. There is no significant provision for the losses.

(c) Liquidity risk

- i. The Group manages and maintains adequate cash and cash equivalents to finance the Group's operations, and minimize the impact from cash flow fluctuations.

- ii. The primary source of liquidity for the Group is from bank loans. See Notes 6(11)(13) for details of the unused credit lines of the Group as of September 30, 2025, December 31, 2024 and September 30, 2024.
- iii. The contractual undiscounted cash flows of notes payable, accounts payable and other payables (including related parties) due within one year and is equivalent to its carrying amount. Except for the aforementioned, the table below summarizes the maturity profile of the Group's non-derivative financial liabilities based on the earliest repayment dates and contractual undiscounted payments, including principal and interest. The Group does not consider the probability of early repayments requested by the banks.

(3) Fair value information

- A. The different levels of inputs used in valuation techniques to measure fair value of financial and non-financial instruments are defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date. An active market is a market in which trading for the asset or liability takes place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices from Level 1 that are observable information for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity investment without active market is included in Level 3.

- B. The carrying amounts of cash and cash equivalents, financial assets at amortized cost, contract assets, accounts receivable, other receivables (including related parties), refundable deposits, short-term and long-term bank loans, notes payable, accounts payable, other payables (including related parties), and guarantee deposits are approximate to their fair values.
- C. The related information of financial and non-financial instruments measured at fair value by level based on the nature, characteristics and risks of the assets and liabilities are as follows:
- (a) The related information of natures of the assets and liabilities are as follows:

	<u>\$ 71,720</u>	<u>\$ -</u>	<u>\$ 128,516</u>	<u>\$ 200,236</u>

(b) The methods and assumptions the Group used to measure fair value are as follows:

- i. The fair value of the Group's listed stocks is measured by using the market quoted prices, which is categorized within Level 1 fair value.
- ii. Except for listed stocks with active markets, the fair value of the Group's other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
- iii. The Group's financial instruments issued by foreign companies are measured by the comparable company valuation (P/B ratio and EV/EBITDA ratio).
- iv. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

D. The following table shows the movements of Level 3 for the nine months ended September 30, 2025 and 2024:

	Equity instruments	
	2025	2024
January 1	\$ 103,013	\$ 120,317
Gains or losses recognized in other comprehensive income		
Recorded as unrealized gain on valuation of financial assets at fair value through other comprehensive income	2,991	8,199
September 30	<u>\$ 106,004</u>	<u>\$ 128,516</u>

- E. The Group performs the fair value measurements being categorized within Level 3 with assistance from specialist. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.
- F. The following is the qualitative information and sensitivity analysis of changes in significant unobservable inputs under valuation model used in Level 3 fair value measurement:

	Fair value as of September 30, 2025	Valuation technique	Significant unobservable input	Range	Relationship of inputs to fair value
Non-derivative equity instrument:					
Foreign unlisted stocks	\$ 106,004	Comparable companies	Price to book ratio multiple	1.01~1.52	The higher the multiple, the higher the fair value
			Discount for lack of marketability	15.60%	The higher the discount for lack of marketability, the lower the fair value
	Fair value as of December 31, 2024	Valuation technique	Significant unobservable input	Range	Relationship of inputs to fair value
Non-derivative equity instrument:					
Foreign unlisted stocks	\$ 103,013	Comparable companies	Enterprise value to EBITDA multiple	8.90	The higher the multiple, the higher the fair value
			Price to book ratio multiple	1.36~1.53	The higher the multiple, the higher the fair value
			Discount for lack of marketability	15.60%	The higher the discount for lack of marketability, the lower the fair value

	Fair value as of September 30, 2024	Valuation technique	Significant unobservable input	Range	Relationship of inputs to fair value
Non-derivative equity instrument:					
Foreign unlisted stocks	\$ 128,516	Comparable companies	Enterprise value to EBITDA multiple	8.72	The higher the multiple, the higher the fair value
			Price to book ratio multiple	1.66	The higher the multiple, the higher the fair value
			Discount for lack of marketability	15.70%	The higher the discount for lack of marketability, the lower the fair value

- G. The Group has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. The following is the effect of profit or loss or of other comprehensive income from financial assets categorized within Level 3 if the inputs used to valuation models have changed:
